Highlights-

- Urban Highway Reconstruction
- Clear Noise Walls
- PADEP stormwater management facility utilization in Urban Corridor

I-95 Reconstruction

Girard Avenue Interchange
Section GR2 Innovations

Presented by

AECOM - Villanova University - PennDOT

The presentation will highlight the first mainline reconstruction phase of the I-95 Girard Ave interchange from I-676 to Allegheny Ave. The project is the replacement of 3 single span bridges to accommodate the future 170 foot width of roadway and ITS elements for Active Traffic Management. The project features thematic form liners, city streetscapes, LED lighting, the first use of clear noisewalls in Pennsylvania, and engineered landscaping and integrated award-winning stormwater management techniques along an urban corridor.
